HAYDEN SWAIN-SCHMIT

(435) 282-5384
Garland, UT 84312
swainschmity@gmail.com

Computer Science senior at Weber State University with a 3.91 GPA and software engineering internship experience in C++, Python, desktop application development, and deployment tooling

Education

Weber State University - Ogden, UT

Bachelor of Science in Computer Science, Expected December 2026

- Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Systems, Computer Organization and Architecture, Discrete Math

Skills

- **Languages:** Python, C++, Java, JavaScript, C, SQL
- **Frameworks & Libraries:** Qt, PySide6, React
- **Build & Package Management:** CMake, Conan, Conda, Artifactory
- **Tools & Technologies:** Git, Linux, Docker, Bash, Nginx, MySQL

Work Experience

Northrop Grumman – Promontory, UT

Software Engineering Intern

June 2026 – Present

- Designed and implemented an automated update framework for internal desktop applications, supporting version detection, downloads, and in-place installation.
- Developed reusable C++ and Python update libraries to simplify integration across applications using different technology stacks.
- Designed and built a working prototype of a standardized deployment and package-hosting system to streamline software distribution across an internal application suite.
- Authored technical documentation and an implementation roadmap to support adoption of the update framework across additional applications and programming languages.

Projects

Dynamic Codespaces – Python, Bash, Docker, Nginx

- Developed a containerized cloud IDE platform that dynamically provisioned isolated Theia development environments using Docker.
- Configured Nginx as a reverse proxy to route users to unique URLs for their active development environments.
- Implemented automated container lifecycle management with inactivity detection and self-termination to reclaim server resources.
- Collaborated with a teammate to design and deploy a scalable multi-user platform for on-demand browser-accessible development environments.
